

R.M.WILLIAMS BOOTS – FIND YOUR SIZE

N.B. We will not be liable for incorrect sizes ordered

STEP 1: FIND YOUR SIZE

Measure your foot length. The simplest way to do this is stand on a piece of paper and mark the points at the back of your heel and tip of your big toe. Wear the type of socks you will wear with your shoes and distribute your weight evenly before measuring. This measurement will determine the length of your foot. TIP: Measure both feet as these may be different. If one foot is larger, choose the larger size.

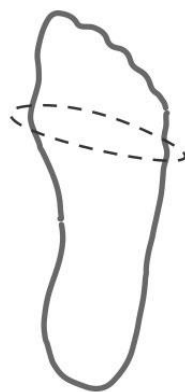

Step 1: Measure your foot length

STEP 2: FIND YOUR WIDTH FITTING

When deciding on the right width fitting, comfort is key. Our fit guides are true to form and there is minimal movement even after wearing the boots in, so select a width fitting that is as close to your foot measurement as possible. Measure around your joint (the widest part of your foot), find the corresponding width fitting in the guide below. The Men's width fitting's range from F - H, of which F is the narrowest fit type and H is the widest fit type.

Step 2: Measure your foot joint

How to measure

1. Neck
Measure around your neck, where the top of the collar would normally be.
2. Sleeve
Bend elbow and measure from centre of neck (rear) to elbow and down to wrist.
3. Chest
Measure around fullest part of chest, keeping tape up under arms.
4. Waist
Measure around waist, at the height you normally wear your trousers.
5. Hips
Stand with heels together, and measure around fullest part.
6. Inleg
Measure from crotch to 1.3cm above floor.
